```
# sacred_texts NPM

The Sacred Texts NPM package simplifies
access to Hadiths and Quranic verses for
developers. This package builds upon the
Hadith API repository to provide an
easy-to-use interface for retrieving
sacred texts.

## Installation

You can install the Sacred Texts NPM
package via npm:

```bash
npm i sacred_texts
```
```

Usage

Import the package in your code:

```
const sacredTexts = require('sacred_texts');
```

Functions

listAvailableEditions(options)

This function retrieves a list of
available Hadith editions.

- `options.language` (optional): Filter
  editions by language.
- `options.limit` (optional): Limit the
  number of editions returned.

Returns: An array of available Hadith
editions.
